Annual Financial Statements for the year ended 30 June 2017

## **Accounting Officer's Responsibilities and Approval**

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the entity and place considerable importance on maintaining a strong control environment. To enable accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The annual financial statements set out on page 5 to 62 which have been prepared on the going concern basis, were approved by the accounting officer on 31 August 2017 and were signed on behalf of the municipality.

I also certify that salaries, allowances and benefits of Councillors, loans made to Councillors, if any, and payments made to Councillors for loss of office as disclosed in the Annual Financial Statements below are within the upper limits of the framework envisaged in Section 219 of the Constitution, read in conjunction with the Public Office Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

Mrs VT Sokhela Accounting Officer

Annual Financial Statements for the year ended 30 June 2017

## **Accounting Policies**

#### 1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

These accounting policies are consistent with the previous period.

#### 1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the entity.

### 1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

#### 1.3 Significant judgements and sources of estimation uncertainty

In preparing the annual financial statements, management is required to make estimates and assumptions that affect the amounts represented in the annual financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the annual financial statements. Significant judgements include:

#### Impairment testing

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions. It is reasonably possible that the assumption may change which may then impact our estimations and may then require a material adjustment to the carrying value of goodwill and tangible assets.

The entity reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of goodwill and tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors.

#### **Provisions**

Provisions were raised and management determined an estimate based on the information available.

Provisions are measured at management's best estimate of the expenditure required to settle the obligation at the reporting date.

Additional disclosure of these estimates of provisions are included in note 17 - Provisions.

Annual Financial Statements for the year ended 30 June 2017

## **Accounting Policies**

#### 1.3 Significant judgements and sources of estimation uncertainty (continued)

#### Post retirement benefits

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

The entity determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the entity considers the interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 13.

#### Effective interest rate

The municipality used the prime interest rate to discount future cash flows.

#### Allowance for doubtful debts

An estimate is made for doubtful debts based on past default experience of all outstanding amounts at year-end excluding amounts due by government departments. In determining the recoverability of a receivable, the municipality considers any change in the credit quality of the receivable from the date on which the credit was initially granted up to financial statement date.

On consumer debtors, an impairment loss is recognised directly in surplus or deficit when there is objective evidence that the debtors are impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

The allowance for doubtful debts takes into account the following to establish their recoverability:

- All reasonable notifications and cost-effective legal avenues have been exhausted to recover a specific outstanding amount;
- All reasonable notifications and cost-effective legal avenues have been exhausted to recover a specific outstanding amount;
- Any amount equal to or less than R500.00, or as determined by Council from time to time, will be considered too small, after having followed basic checks, to warrant further endeavours to collect it;
- The cost to recover the debt does not warrant further action;
- It has been proven that the debt has prescribed;
- The debtor is untraceable or cannot be identified so as to proceed with further action;
- The debtor has emigrated leaving no assets of value to cost-effectively recover the Municipality's claim;
- It is not possible to prove the debt outstanding;
- A court has ruled that the claim is not recoverable;
- The claim is subject to any order of court;
- The claim is subject to an out of court settlement agreement;
- The debt is subject to a settlement in terms of section 109 of the Systems Act;
- The Municipality has resolved that the debt is irrecoverable.

### Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern.

The municipality considered the following to establish the ability to continue as a going concern:

- Medium Term Revenue and Expenditure Framework (MTREF);
- Division of Revenue Act (DoRA)
- Debt vs asset ratio
- Liquidity ratio
- Cash coverage ratio
- Cash flow position
- Collection rate

Annual Financial Statements for the year ended 30 June 2017

## **Accounting Policies**

#### 1.4 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the entity; and
- the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

Assets under construction (Work in progress or AUC) is recognised at cost. Total costs of completed projects are transferred from assets under construction to a relevant category or class of assets.

The useful lives of items of property, plant and equipment have been assessed as follows:

| Item                                | Depreciation method | Average useful life |
|-------------------------------------|---------------------|---------------------|
| Land                                | Straight line       | Indefinite          |
| Buildings                           | Straight line       | 25-30 years         |
| Motor vehicles                      | Straight line       | 7 years             |
| Infrastructure                      | Straight line       | •                   |
| <ul> <li>Roads</li> </ul>           | -                   | 10-50 years         |
| Other property, plant and equipment | Straight line       | ,                   |
| Machinery & Equipment               | •                   | 4-5 years           |
| Furniture and Equipment             |                     | 7-10 years          |
| Computer Equipment                  |                     | 5 years             |
| Leased Assets                       | Straight line       | 2 years             |
| Assets Under Construction           | ·                   | Nil                 |

The residual value, the useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Reviewing the useful life of an asset on an annual basis does not require the entity to amend the previous estimate unless expectations differ from the previous estimate.

Annual Financial Statements for the year ended 30 June 2017

## **Accounting Policies**

#### 1.4 Property, plant and equipment (continued)

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

#### 1.5 Intangible assets

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or
  exchanged, either individually or together with a related contract, identifiable assets or liability, regardless of
  whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the entity or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the entity; and
- the cost or fair value of the asset can be measured reliably.

Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale.
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it.
- it will generate probable future economic benefits or service potential.
- there are available technical, financial and other resources to complete the development and to use or sell the
  asset
- the expenditure attributable to the asset during its development can be measured reliably.

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

ItemUseful lifeComputer software3 years

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of an intangible assets is included in surplus or deficit when the asset is derecognised.

Annual Financial Statements for the year ended 30 June 2017

## **Accounting Policies**

#### 1.6 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or non collectability.

A concessionary loan is a loan granted to or received by an entity on terms that are not market related.

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Derecognition is the removal of a previously recognised financial asset or financial liability from a entity's statement of financial position.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, an entity shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate (see the Standard of GRAP on Revenue from Exchange Transactions), transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument (or group of financial instruments), the entity shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash;
- a residual interest of another entity; or
- a contractual right to:
  - receive cash or another financial asset from another entity; or
  - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Liquidity risk is the risk encountered by a entity in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

Loans payable are financial liabilities, other than short-term payables on normal credit terms.

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk.

Annual Financial Statements for the year ended 30 June 2017

## **Accounting Policies**

### 1.6 Financial instruments (continued)

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market

A financial asset is past due when a counterparty has failed to make a payment when contractually due.

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

Financial instruments at amortised cost are non-derivative financial assets or non-derivative financial liabilities that have fixed or determinable payments, excluding those instruments that:

- the entity designates at fair value at initial recognition; or
- are held for trading.

Financial instruments at cost are investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

Financial instruments at fair value comprise financial assets or financial liabilities that are:

- derivatives:
- combined instruments that are designated at fair value;
- instruments held for trading. A financial instrument is held for trading if:
  - it is acquired or incurred principally for the purpose of selling or repurchasing it in the near-term; or
  - on initial recognition it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short term profit-taking;
  - non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; and
  - financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

#### Classification

The classification of financial assets depends on their nature and purpose and is determined at the time of initial recognition.

#### Initial recognition

The entity recognises a financial asset or a financial liability in its statement of financial position when the entity becomes a party to the contractual provisions of the instrument.

### Initial measurement of financial assets and financial liabilities

The entity measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The entity measures a financial asset and financial liability initially at its fair value.

Annual Financial Statements for the year ended 30 June 2017

## **Accounting Policies**

## 1.6 Financial instruments (continued)

#### Subsequent measurement of financial assets and financial liabilities

The entity measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

#### **Gains and losses**

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

#### Impairment and non-collectability of financial assets

The entity assess at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

Financial assets measured at cost:

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

Annual Financial Statements for the year ended 30 June 2017

## **Accounting Policies**

#### 1.6 Financial instruments (continued)

#### Derecognition

#### Financial assets

The entity derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the entity transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the entity, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the entity:
  - derecognise the asset; and
  - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

If the entity transfers a financial asset in a transfer that qualifies for derecognition in its entirety and retains the right to service the financial asset for a fee, it recognise either a servicing asset or a servicing liability for that servicing contract. If the fee to be received is not expected to compensate the entity adequately for performing the servicing, a servicing liability for the servicing obligation is recognised at its fair value. If the fee to be received is expected to be more than adequate compensation for the servicing, a servicing asset is recognised for the servicing right at an amount determined on the basis of an allocation of the carrying amount of the larger financial asset.

If, as a result of a transfer, a financial asset is derecognised in its entirety but the transfer results in the entity obtaining a new financial asset or assuming a new financial liability, or a servicing liability, the entity recognise the new financial asset, financial liability or servicing liability at fair value.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

If the transferred asset is part of a larger financial asset and the part transferred qualifies for derecognition in its entirety, the previous carrying amount of the larger financial asset is allocated between the part that continues to be recognised and the part that is derecognised, based on the relative fair values of those parts, on the date of the transfer. For this purpose, a retained servicing asset is treated as a part that continues to be recognised. The difference between the carrying amount allocated to the part derecognised and the sum of the consideration received for the part derecognised is recognised in surplus or deficit.

If a transfer does not result in derecognition because the entity has retained substantially all the risks and rewards of ownership of the transferred asset, the entity continue to recognise the transferred asset in its entirety and recognise a financial liability for the consideration received. In subsequent periods, the entity recognises any revenue on the transferred asset and any expense incurred on the financial liability. Neither the asset, and the associated liability nor the revenue, and the associated expenses are offset.

#### **Financial liabilities**

The entity removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

Annual Financial Statements for the year ended 30 June 2017

## **Accounting Policies**

#### 1.6 Financial instruments (continued)

#### Presentation

Interest relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Losses and gains relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

A financial asset and a financial liability are only offset and the net amount presented in the statement of financial position when the entity currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

In accounting for a transfer of a financial asset that does not qualify for derecognition, the entity does not offset the transferred asset and the associated liability.

#### 1.7 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

#### Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessee is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

### Operating leases - lessor

Operating lease revenue is not recognised as revenue on a straight-line basis over the lease term as the difference between the amounts recognised as operating lease revenue and the contractual receipts are considered immaterial.

Income for leases is disclosed under revenue in statement of financial performance.

### Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

#### 1.8 Impairment of non-cash-generating assets

Cash-generating assets are assets managed with the objective of generating a commercial return. An asset generates a commercial return when it is deployed in a manner consistent with that adopted by a profit-oriented entity.

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

Annual Financial Statements for the year ended 30 June 2017

## **Accounting Policies**

#### 1.8 Impairment of non-cash-generating assets (continued)

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Useful life is either:

- (a) the period of time over which an asset is expected to be used by the entity; or
- (b) the number of production or similar units expected to be obtained from the asset by the entity.

#### Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The entity assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the entity estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also test a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

#### Value in use

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the following approach:

#### Depreciated replacement cost approach

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

#### Recognition and measurement

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

Annual Financial Statements for the year ended 30 June 2017

## **Accounting Policies**

#### 1.8 Impairment of non-cash-generating assets (continued)

#### Reversal of an impairment loss

The entity assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

#### 1.9 Employee benefits

#### Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of surplus sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

#### **Defined contribution plans**

Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

Payments made to industry-managed (or state plans) retirement benefit schemes are dealt with as defined contribution plans where the entity's obligation under the schemes is equivalent to those arising in a defined contribution retirement benefit plan.

#### 1.10 Provisions and contingencies

Provisions are recognised when:

- the entity has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

Annual Financial Statements for the year ended 30 June 2017

## **Accounting Policies**

#### 1.10 Provisions and contingencies (continued)

Contingent assets and contingent liabilities are not recognised.

#### Decommissioning, restoration and similar liability

Changes in the measurement of an existing decommissioning, restoration and similar liability that result from changes in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in the discount rate, is accounted for as follows:

If the related asset is measured using the cost model:

- changes in the liability is added to, or deducted from, the cost of the related asset in the current period.
- the amount deducted from the cost of the asset does not exceed its carrying amount. If a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit.
- if the adjustment results in an addition to the cost of an asset, the entity consider whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If there is such an indication, the entity test the asset for impairment by estimating its recoverable amount or recoverable service amount, and account for any impairment loss, in accordance with the accounting policy on impairment of assets as described in accounting policy and 1.8.

The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability is recognised in surplus or deficit as they occur. This applies under both the cost model and the revaluation model.

The periodic unwinding of the discount is recognised in surplus or deficit as a finance cost as it occurs.

#### 1.11 Commitments

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

#### 1.12 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

### Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

#### Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Annual Financial Statements for the year ended 30 June 2017

# **Accounting Policies**

#### 1.12 Revenue from exchange transactions (continued)

#### Interest

Interest is recognised, in surplus or deficit, using the effective interest rate method.

#### 1.13 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by a municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, the entity either receives value from another entity without directly giving approximately equal value in exchange, or gives value to another entity without directly receiving approximately equal value in exchange.

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

#### Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the entity satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

#### Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the entity.

When, as a result of a non-exchange transaction, the entity recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

### **Transfers**

Apart from Services in kind, which are not recognised, the entity recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

The entity recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

#### Debt forgiveness and assumption of liabilities

The entity recognise revenue in respect of debt forgiveness when the former debt no longer meets the definition of a liability or satisfies the criteria for recognition as a liability, provided that the debt forgiveness does not satisfy the definition of a contribution from owners.

Revenue arising from debt forgiveness is measured at the carrying amount of debt forgiven.

Annual Financial Statements for the year ended 30 June 2017

## **Accounting Policies**

#### 1.13 Revenue from non-exchange transactions (continued)

#### **Fines**

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the entity.

Where the entity collects fines in the capacity of an agent, the fine will not be revenue of the collecting entity.

#### 1.14 Investment income

Investment income is recognised on a time-proportion basis using the effective interest method.

#### 1.15 Borrowing costs

Borrowing costs are recognised as an expense in the period in which they are incurred.

#### 1.16 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year as per note #.

#### 1.17 Unauthorised expenditure

Unauthorised expenditure means:

- overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

#### 1.18 Fruitless and wasteful expenditure

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

## 1.19 Irregular expenditure

Irregular expenditure as defined in section 1 of the MFMA is expenditure other than unauthorised expenditure, incurred in contravention of or that is not in accordance with a requirement of any applicable legislation, including -

- (a) this Act and the Municipal Systems Act and has not been condoned by the said Acts; or
- (b) the Public Office-Bearers Act, 1998 (Act No. 20 of 1998); or
- (c) the requirement of the supply chain management policy of the municipality or entity or any of the municipality's by-laws giving effect to such policy, and which has not been condoned in terms of such policy or by-law.

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

Annual Financial Statements for the year ended 30 June 2017

## **Accounting Policies**

#### 1.20 Conditional grants and receipts

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised.

#### 1.21 Budget information

Municipalities are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by the municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on an accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 01/07/2016 to 30/06/2017.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

#### 1.22 Related parties

Management are those persons responsible for planning, directing and controlling the activities of the entity, including those charged with the governance of the entity in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the entity.

The relationships above as well as transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

#### 1.23 Events after reporting date

Events after reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date);
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

The entity will adjust the amount recognised in the financial statements to reflect adjusting events after the reporting date once the event occurred.

The entity will disclose the nature of the event and an estimate of its financial effect or a statement that such estimate cannot be made in respect of all material non-adjusting events, where non-disclosure could influence the economic decisions of users taken on the basis of the financial statements.

#### 1.24 Commitments

The municipality will disclose authorised operational and capital expenditure, that which has been approved and contracted for and that which has been approved and not yet contracted for. Outstanding operating lease commitments owing by the municipality and the periods in which payments fall due will also be disclosed.

#### 1.25 Events after the reporting date

Events after the reporting date are those events both favourable and unfavourable, that occur between the reporting date and the date when the annual financial statements are authorised for issue. The entity will adjust the amounts recognised in the annual financial statements to reflect adjusting events after the reporting date once the event occurred.

Annual Financial Statements for the year ended 30 June 2017

## **Notes to the Annual Financial Statements**

Rands 2017 2016

#### 2. New standards and interpretations

#### 2.1 Standards and interpretations effective and adopted in the current year

In the current year, the municipality has adopted the following standards and interpretations that are effective for the current financial year (effective from 1 April 2016) and that are relevant to its operations:

- GRAP 1 Presentation of Financial Statements
- GRAP 2 Cash Flow Statement
- GRAP 3 Accounting Policies, Changes in Accounting Estimates and Errors
- GRAP 9 Revenue from Exchange Transactions
- GRAP 13 Leases
- GRAP 14 Events After the Reporting Date
- GRAP 17 Property Plant and Equipment
- GRAP 19 Provisions, Contingent Liabilities and Contingent Assets
- GRAP 21 Impairment of Non-cash-generating Assets
- GRAP 23 Revenue from Non-exchange Transactions (Taxes and Transfers)
- GRAP 24 Presentation of Budget Information in Financial Statements
- GRAP 25 Employee Benefits
- GRAP 26 Impairment of Cash-generating assets
- GRAP 31 Intangible Assets
- GRAP 104 Financial Instruments

#### 2.2 Standards and Interpretations early adopted

The municipality has chosen to early adopt the following standards and interpretations:

#### Standard/ Interpretation:

GRAP 20: Related Party Disclosures - issued June 2011:

Compliance with this standard would have had an effect on the presentation only. Related party transactions have been disclosed in accordance with IPSAS 20.

#### 2.3 Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published but the effective dates were not determined by the Minister. The standards tabled below may be applicable for the municipality's accounting periods beginning on or after 01 July 2017 or later periods.

## Standard/ Interpretation:

Annual Financial Statements for the year ended 30 June 2017

### **Notes to the Annual Financial Statements**

#### 2. New standards and interpretations (continued)

GRAP 32: Service Concession Arrangements: Grantor

GRAP 108: Statutory Receivables

GRAP 109: Accounting by Principals and Agents.

GRAP 20: Related Party Disclosures - issued June 2011:

Compliance with this standard would have had an effect on the presentation only. Related party transactions have been disclosed in accordance with IPSAS 20.

GRAP 32 and IGRAP 17: Service Concession Arrangements: Grantor - issued August 2013:

Compliance with this standard will not have an impact on the current financial information as no transactions relating to service concession arrangements exists in the current year.

GRAP 108: Statutory Receivables - issued September 2013:

Compliance with this standard would have had an effect on presentation and disclosure only. GRAP 108 requires separate disclosure of statutory receivables together with additional disclosure on measurement basis and impairment criteria.

GRAP 109: Accounting by Principals and Agents issued July 2015:

Compliance with this standard would have had an effect on presentation and disclosure. The information disclosed in accordance with this Standard shall be provided for each material principal-agent arrangement and in aggregate for other principal-agent arrangements. Compliance with this standard will not have an impact on the current financial information as no transactions relating to principal-agent arrangements exists in the current year.

#### 3. VAT receivable

| VAT  | 340 746                         | 4 050 430                         |
|--|---------------------------------|-----------------------------------|
| VAT receivable comprised as follows: Input VAT claimed through VAT 201 returns submitted Undeclared Output VAT Unclaimed Input VAT | 738 318<br>(580 675)<br>183 103 | 4 589 467<br>(688 889)<br>149 852 |
| <del>-</del>   | 340 746                         | 4 050 430                         |

As at 30 June 2017, VAT refunds relating to VAT201 declarations submitted between the period May and June 2017 were receivable from SARS.

As at 30 June 2016, VAT refunds relating to VAT201 declarations submitted between the period January and June 2016 were receivable from SARS. VAT of R4 666 622 was subsequently receipted during the 2016/17 financial year. Interest of R77 155 relating to VAT receivable was recognisd as interest income for the year ended 30 June 2017.

### 4. Other receivables

| Library fines                | 388         | 362         |
|------------------------------|-------------|-------------|
| Staff debtors                | 75 250      | 288 783     |

Staff debtors relates to allegations involving a staff member for misappropriation of licence fees collected. As at 30 June 2017, the allegations were subject to investigations in terms of the disciplinary procedures and codes for municipal staff. The municipality recognised an amount of R75 250 allegedly misappropriated as a receivable pending the outcome of the investigation. Refer note 42 - Investigations.

## Consumer debtors pledged as security

No consumer debtors were pledged as security for collateral liabilities.

Annual Financial Statements for the year ended 30 June 2017

## **Notes to the Annual Financial Statements**

| Danda | 2017 | 2016 |
|-------|------|------|
| Rands | 2017 | 2010 |

### 5. Consumer debtors (continued)

An estimate was made for doubtful debt based on past default experience of all outstanding amounts at year-end excluding amounts due from government departments. In establishing the recoverability of a receivable, the municipality considers any change in the credit quality of the receivable from the date on which the credit was initially granted up to the reporting date.

Debtors who made payment during 2016/17 toward outstanding amounts owed to the municipality were identified and assessed for impairment. This included the total rand value and frequency of payments received toward respective outstanding debtor balances.

Debtors with credit account balances (R634 032 classified and reflected as payables from exchange transactions) were excluded from the provision calculation.

Default debtors comprised business accounts, residential and other debtor categories. In accordance with the municipality's credit control policy, debtors who did not make payment for the duration of 2016/17 and with outstanding balances 90 days and over as at 30 June 2017, were assessed as doubtful. Other default debtors comprising business accounts, residential and other debtor categories, who have not settled oustanding amounts owing to the municipality were assessed as doubtful.

#### 6. Prepayments

| Prepaid expenditure   | 707 250             | 308 520             |

The municipality procured cellular and communication devices over a period of twenty four (24) months which have been classified as finance leases.

Monthly instalments are payable in arrears. The average interest rate implicit in respective lease contracts is approximately 11.7% (2016: 13.3%) All leases have fixed repayments and no arrangements have been entered into for contingent lease rentals.

## 11. Operating lease liability

Non-current liabilities

**Current liabilities** 

| Operating lease liability - Straightlined lease balance | 690 064 | 417 008 |
|---|---------|---------|
|---|---------|---------|

Operating lease payments have been recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments have been recognised as an operating lease asset or liability.

#### 12. Payables from exchange transactions

| Trade payables                | 6 988 363  | 4 585 440  |
|-------------------------------|------------|------------|
| Payments received in advanced | -          | 10 747     |
| Third party deductions        | 6 946      | 291 734    |
| Leave accrual                 | 6 603 834  | 5 866 778  |
| Deposits received             | 35 132     | 34 032     |
| Unallocated receipts          | 900 175    | 374 634    |
| Sundry Creditors              | 4 826 191  | 3 956 207  |
| Retentions                    | 1 299 372  | 245 509    |
|                               | 20 660 013 | 15 365 081 |

The credit period relating to trade payables is consistent with the credit terms used in the public sector i.e. thirty (30) days. As a result, discounting was not performed.

Annual Financial Statements for the year ended 30 June 2017

#### 13. Employee benefit obligations

#### Defined benefit plan

The municipality's employees are members of the Natal Joint Pension Retirement Fund, including the Supernannuation Retirement and Provident Fund. As the aforementioned funds are multi-employer funds, the allocation of any surplus/deficit to the individual municipalities cannot be determined. Furthermore, disclosure of further details such as actuarial assumptions, cannot be attributed to any specific municipality and is of no relevance to users of the municipality's financial statements. As the required disclosure information cannot be obtained the funds are all treated as defined contribution plans.

#### **Long Term Service Awards Benefits**

Long service benefits are awarded in the form of leave days once an employee has completed a certain number of years in service to the municipality. Awarded leave days are converted to a percentage of annual salary by assuming there are two hundred and fifty two (252) working days per year or twenty one (21) working days per month. The expected value of each employees's long service award is projected to the next interval by allowing for salary growth.

The calculated award values are then discounted to the rate based on market yields on government bonds as at the end of June 2017 as published by the Bond Exchange of South Africa.

The salary escalation rate is based on underlying market inflation plus an allowance for the fact that on average salary increases generally exceed inflation. Also factored into the valuation were there average age for mortality, retirements and withdrawals from service were considered.

The accrued liability is determined on the basis that each employee's long service benefit accrues uniformly over the working life of an employee up to the interval at which the benefit becomes payable. It is also assumed that the current policy for awarding long service awards remains unchanged in the future.

#### The amounts recognised in the statement of financial position are as follows:

| Carrying value Accrued liability - Employee benefit obligation                            | 3 293 460  | 3 069 448   |
|---|--|---|
| Non-current liabilities Current liabilities   | (3 130 684)<br>(162 776)                                 | (2 993 170)<br>(76 278)                                 |
|   | (3 293 460)  | (3 069 448)   |
| Changes in the present value of the defined benefit obligation are as follows:            |  |   |

#### **Environmental rehabilitation provision**

The provision for rehabilitation for landfill site represents management's best estimate of the municipality's liability relating to closure and rehabilitation of the landfill site.

Decommissioning costs includes costs associated with decommissioning end-use infrastructure, compacting works, capping, top-up soling and vegetation as well as costruction of stormwater control systems.

The discount rate used for the present value calculation was based on GOVI long bond and amounts to 9.35%.

#### Performance bonuses

Perforamnce bonuses for Section 57 employees in accordance with Regulation 8 of the Local Government: Municipal Performance Management Regulations for Municipal Managers and Managers Directly Accountable to Municipal Managers, 2006.

Overall performance and assessment ratings for respective employees shall be evaluated by the municipality using their applicable key performance indicators (KPIs). Performance bonuses relating to the financial year are payable subsequent to year end after the annual report is tabled and adopted by Council and Section 57 employees' annual performance evaluated in accordance with Regulation 23 of the Local Government: Municipal Performance Management Regulations.

#### 16. Instalment sale liability

Current portion - 53 918

The municipality entered into an instalment sale agreement with ABSA Bank for the purchase of a motor vehicle. The loan was repayable over a period of sixty month but was settled during the year. Finance charges were incurred at an interest rate of 10.60% per annum.

The instalment sale liability was secured against a motor vehicle with a carrying value of R320 246 (2016: R393 372).

Performance bonuses provided for 454 042 538 639

Remuneration paid to Councillors

Salaries and allowances 13 185 056 12 494 878

#### 35. Comparative figures

Certain comparative figures have been restated.

#### Retentions

Retention liabilities were previously presented separately on the statement of financial position. During the current year, retention liabilities were correctly reclassified as payables from exchange transactions.

#### **Employee benefit obligation**

The accrued liability relating to the employee benefit obligation was not split into a current and non-current portion. During the current year, the current portion of the employee benefit obligation liability was correctly classified.

#### Lease rentals on operating leases

Lease rentals were previously presented separately on the statement of financial performance. During the current year, lease rentals on operating leases were correctly reclassified as contracted services.

The effects of the reclassification are as follows:

#### Statement of financial position

| Payables from exchange transactions               | - | 245 509   |
|---|---|-----------|
| Retentions  | - | (245 509) |
| Employee benefit obligation - Current portion     | - | (76 278)  |
| Employee benefit obligation - Non-current portion | - | 76 278    |

#### Statement of Financial Performance

| Otatomont of i manda i criormano  |               |
|-----------------------------------|---------------|
| Lease rentals on operating leases | - (3 491 008) |
| Contracted services               | - 4 449 614   |
| Repairs and maintenance           | - (6 370 572) |
| Transfers and subsidies           | - (876 383)   |
| General expenditure               | - 6 288 349   |

#### 36. Prior period errors

Certain comparative figures were restated.

#### Operating lease liability - Straightlining of operating leases

The municipality did not reconcile the straightline operating lease liability in the comparative period. The straightline lease liability was subsequently reconciled and retrospectively corrected in the current financial year. **As a result, the straightline operating lease liability** 

#### Statement of financial position

Operating lease liability - Straightlining of operating leases - (192 752)

#### **Statement of Financial Performance**

Contracted services - Straightlining of operating leases - 192 752

#### 38. Changes in estimates

#### Property, plant and equipment

The municipality assessed the useful life of property, plant and equipment during the current reporting period. The useful life of certain items of property, plant and equipment were revised.

The impact of this revision in the current and future accounting periods are as follows:

| Statement of financial performance | Current period | Future periods |
|------------------------------------|----------------|----------------|
| Decrease in depreciation           | -R 1 390 758   | -R9 290 912    |

|-------|------|------|
| Nanus | 2017 | 2010 |

#### 39. Risk management

#### Capital risk management

The municipality's objectives when managing capital are to safeguard the municipality's ability to continue as a going concern in order to provide returns for member and benefits for other stakeholder returns and to maintain an optimal capital structure to reduce the cost of capital.

The capital structure of the municipality's consists of debt, which includes the borrowings in the form of instalment sale obligation as disclosed in note 16 and 10, cash and cash equivalents disclosed in note 7, and equity as disclosed in the statement of financial position.

Consistent with others in the industry, the municipality's monitors capital on the basis of the gearing ratio.

This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including 'current and non-current borrowings' as shown in the statement of financial position) less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the statement of financial position plus net debt.

There are no externally imposed capital requirements.

There have been no changes to what the municipality manages as capital, the strategy for capital maintenance or externally imposed capital requirements from the previous year.

The gearing ratio at 2017 and 2016 respectively were as follows:

| Total capital                       |    | 354 596 709               | 313 846 597              |
|-------------------------------------|----|---------------------------|--------------------------|
| Net debt<br>Total equity            |    | 17 152 056<br>337 444 653 | 9 025 542<br>304 821 055 |
| Less: Cash and cash equivalents     | 7  | 3 678 251                 | 6 545 788                |
|                                     |    | 20 830 307                | 15 571 330               |
| Payables from exchange transactions |    | 20 660 013                | 15 365 081               |
| Instalment sale liability           | 16 | -                         | 53 918                   |
| Finance lease obligation            | 10 | 170 294                   | 152 331                  |
| Total borrowings                    |    |                           |                          |

#### Financial risk management

The municipality's operations expose it to market risk i.e. interest rate risk, liquidity risk and credit risk.

#### Liquidity risk

Liquidity risk is the risk that the municipality will not be able to meet its obligations as they fall due. The municipality's approach to managing liquidity risk is to ensure that sufficient liquidity is available to meets its liabilities when due, without incurring unacceptable losses or risking damage to the municipality's reputation.

#### Interest rate risk

The municipality's interest rate risk arises from long-term borrowings. Borrowings issued at fixed rates expose the municipality to fair value interest rate risk. During 2017 and 2016, the municipality's borrowings were denominated in the Rand.

Annual Financial Statements for the year ended 30 June 2017

#### **Notes to the Annual Financial Statements**

| Rands | 2017 | 2016 |
|-------|------|------|
| Nanus | 2017 | 2010 |

#### 39. Risk management (continued)

#### Credit risk

Credit risk consists mainly of cash deposits, cash equivalents and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluates credit risk relating to customers on an ongoing basis. Sales to retail customers are settled in cash or using major credit cards.

#### Financial assets exposed to credit risk and financial liabilities exposed to liquidity risk at year end were as follows:

| Financial instrument                | 2017       | 2016       |
|-------------------------------------|------------|------------|
| Consumer debtors                    | 26 563 536 | 21 858 156 |
| Other receivables                   | 559 083    | 530 130    |
| Cash and cash equivalents           | 3 678 251  | 6 545 788  |
| Finance lease obligation            | 170 294    | 152 331    |
| Operating lease liability           | 690 064    | 417 008    |
| Payables from exchange transactions | 20 660 013 | 15 365 081 |

#### 40. Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The ability of the municipality to continue as a going concern however, is dependent on a number of factors. The most significant of these is that the municipality will still continue to obtain grants from National Treasury and the capital expenditure committed which is a major expenditure item is funded by government grants. The municipality also receives Equitable Share to fund its operations.

As at the date of approval of the annual financial statements, there were no material uncertainties related to events or conditions which may cast significant doubt upon the municipality's ability to continue as a going concern.

#### 41. Events after the reporting date

There were no material events after the reporting date.

#### 42. Contingencies

#### **Contingent liabilities**

Pending litigation matters and claims that the municipality was party to as at 30 June 2017 comprised:

- Eviction matter Unlawful Occupation of Land. Legal counsel's estimate of financial exposure is approximately R350 000.
- Eviction matter Unlawful Occupation of Land. Legal counsel's estimate of financial exposure is approximately R500 000.
- Recovery of funds Legal action was taken against the municipality by Econocom Consulting Civil and Structural Engineers & Others. Legal counsel's estimate of financial exposure is approximately R400 000.
- Recovery of funds Legal action was taken by the municipality against Mr MJ Dladla. Legal counsel's estimate of financial exposure is approximately R500 000.
- Judgement matter Judgement application opposed on the matter between Telkom and the municipality. Legal counsel's estimate of financial exposure is approximately R350 000.
- Labour matter Legal action was taken against the municipality by an employee relating to termination of his contract of employment. An estimate of the potential claim as at financial statement date could not be quantified.

#### 43. Investigations

The following are the matters for which investigations were conducted:

Annual Financial Statements for the year ended 30 June 2017

#### **Notes to the Annual Financial Statements**

Rands 2017 2016

#### 43. Investigations (continued)

- MEC (COGTA) appointed PWC to conduct a forensic investigation into allegations of improper use of funds
  regarding the (a) Museum, (b) Absa link road, (c) Lost/stolen cheques, and (d) the Bypass road. In addition, due
  to the Presidential hotline, other matters had to be included in the investigation, for example, overtime as well as
  appointment of directors without following regulations. The forensic investigation was completed, the report was
  presented to the MEC and also tabled before the council.
- In the matter of the museum, consultations have been held with the former Director of Corporate Services Mr. MJ Dladla, who was dismissed in 2015. Summons have been drafted and will be served in due course. Companies (Mageba Trading, Econocom and Plaktin Trading) which were implicated in the matter of the museum were served with summons in an attempt to recover the money that was lost. Isiphiwo Trading was not served as the sheriff could' not locate them. Efforts to locate them are still being made. Mageba Trading made a proposal to make a monthly payment of R25 000. The Council subsequently rejected the proposal and further legal action is being taken.
- The disciplinary enquiry against the three suspended directors commenced in June 2017 and their cases are
  ongoing. The allegations involving junior staff members (allegations of misappropriation of licence fees and
  purchase of political t-shirts) have been subjected to further investigations in terms of the Disciplinary Procedures
  & Codes for Municipal staff. A final report in this regard was expected from an independent investigator and
  prosecutor on 31 July 2017.

| Total commitments Authorised capital expenditure Authorised operational expenditure         | 16 713 417<br>9 370 509 | 49 868 625<br>14 609 231 |
|   | 26 083 926              | 64 477 856               |

Commitments (and corresponding expenditure incurred thereon) relates to capital projects and other operational programmes that will be financed by available government grants, retained surpluses, existing cash resources and funds internally generated.

#### Operating leases - as lessee (expense)

#### Minimum lease payments due

|                                     | 11 918 653 | 10 914 560 |
|-------------------------------------|------------|------------|
| - in second to fifth year inclusive | 7 204 005  | 7 236 135  |
| - within one year                   | 4 714 648  | 3 678 425  |

Operating lease payments comprise office equipment leased from Nashua Zululand whilst properties are leased from Priscila Bond. No contingent rent is payable.

Leases are negotiated for an average of three years and rentals vary in terms of a contract of the lease. Leases are subject to escalation at an average rate of 9% (2016: 9% over the lease period).

#### 45. Unauthorised expenditure

| Unauthorised expenditure Unauthorised expenditure - Current year | 31 773 115<br>16 673 269 | 19 471 839<br>12 301 276 |

#### 49. Actual operating expenditure versus budgeted operating expenditure

Refer to Appendix E(1) for the comparison of actual operating expenditure versus budgeted operating expenditure.

#### 50. Actual capital expenditure versus budgeted capital expenditure

Refer to Appendix E(2) for the comparison of actual capital expenditure versus budgeted capital expenditure.

#### 51. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

Goods and services procured during the financial year under review and the process followed in procuring those goods and services deviated from the provisions of paragraph 12(1)(d)(i) as stated above. The reasons for these deviations were documented and reported to the accounting officer who considered them and subsequently approved the deviation from the normal supply chain management regulations.

Deviations from municipal supply chain management regulations for the year ended 30 June 2017 amounted to R981 113 (2016: R3 500 800).
